

Press Release

NOUVEL's Jim Herbeck to speak on iPhone Insecurity for SANS Webcast on May 18

UPDATE > May 19, 2010: the iPhone Insecurity webcast can now be viewed in the SANS Webcast Archive at the URL below. The handout from the webcast is available on the NOUVEL research page.

UPDATE > May 11, 2010: the SANS Information Security Webcast has been rescheduled from May 11 to May 18.

(Geneva, Switzerland) May 3, 2010. NOUVEL Strategies partner Jim Herbeck will be the featured speaker at a SANS Information Security Webcast on May 18, 2pm CET. The topic will be iPhone Insecurity:

The Apple iPhone is rapidly becoming the most popular smartphone in the world. Despite concerns over the security features - or rather, lack of security features - the iPhone has been sold in large quantities to Fortune 100 corporations and government agencies. This webcast discusses the information risks associated with using the iPhone, security features that are available, and why everyone is excited to see the new security features to be released this summer with the next version of iPhone OS.

SANS Information Security Webcasts are web broadcasts, including live audio while viewing presentation slides downloaded in advance. Participation is free, though registration is required. Details can be found at the SANS website: <https://www.sans.org/webcasts/>

Notes for Editors:

About the SANS Institute: The SANS Institute is the most respected and by far the largest provider of advanced cybersecurity education and certification. SANS' 83,000 alumni operate and manage cybersecurity capabilities in more than 60 countries. In addition to the Internet Storm Center, the open source early warning system for the Internet, SANS manages the Software Security Institute, which is setting standards and developing certifications for measuring secure application development skills.
