

Press Release

NOUVEL's Jim Herbeck to present SANS Institute webcast "Managing Network-related Risk for SMEs" on 20 Mar

(Geneva, Switzerland) 19 Dec 2011. NOUVEL Strategies partner Jim Herbeck will be the featured speaker at a SANS Information Security Webcast on Tuesday, 20 Mar, 3pm CET. The topic will be "Managing Network-related Risk for SMEs":

Everyone understands that the threat of cyber attack via the Internet is very real. And every small- and medium-sized enterprise (SME) has implemented a firewall to manage that risk. "But is that enough?" asks Jim Herbeck, presenter of this webcast on information security for SMEs. "A network firewall is only the starting point for network security, not the endpoint. There are many additional steps an SME can take to secure their network," says Herbeck. This webcast offers concrete advice for SMEs about managing network-related risk from ISO 27001 and the SANS 20 Critical Security Controls. The webcast is appropriate for anyone who's responsible for managing, developing, or implementing information security at an SME.

This is the fourth webcast in the Information Security for SMEs Series. Each webcast addresses a specific area of information security and offers pragmatic advice for SMEs. Details about the series can be found at the NOUVEL website: <http://nouvelstrategies.com/InfoSec-for-SMEs>

SANS Information Security Webcasts are web broadcasts, including live audio while viewing presentation slides. Participation is free, though registration is required. Details can be found at the SANS website: <http://www.sans.org/webcasts>

The webcast is scheduled for 3pm CET (Central European Time), 2pm GMT (Greenwich Mean Time), 10am EDT (US Eastern Daylight Time) on Tuesday, 20 Mar 2012.

Note: In the US, SMEs are more commonly referred to as Small and Medium Businesses (SMBs).

Notes for Editors:

About the SANS Institute: The SANS Institute was established in 1989 as a cooperative research and education organization. SANS is the most trusted, and by far the largest, source for information security training and security certification in the world. In addition to world-class training, SANS offers certification via the ANSI accredited GIAC security certification program. SANS offers a myriad of free resources to the InfoSec community including consensus projects, research reports, and newsletters; and it operates the Internet's early warning system - the Internet Storm Center. At the heart of SANS are the many security practitioners in varied global organizations from corporations to universities working together to help the entire information security community.
